

Francesco Da Rin Zanco

Full-Stack Developer

Belluno, Italy · +39 351 851 1209 · darinzancof@gmail.com ·
<https://www.linkedin.com/in/francesco-da-rin-zanco-0b6071272> · <https://github.com/daro-hub>

Professional Summary

Full-stack developer at amuseapp, building the platforms behind museum ticketing and visitor experiences: backoffice console, visitor webapp, mobile app and the Android kiosk software that talks to payment hardware. Outside work I build AI projects solo, end to end, such as Second Brain, a personal assistant I use daily that answers from my notes and live data and runs a coding agent with human approval. Bachelor's student in Computer Science (IoT, Big Data & ML) at the University of Udine, looking for an Erasmus+ 2026-2027 internship.

Technical Skills

Frontend: Next.js, React, TypeScript, Tailwind CSS

Mobile: React Native, Expo

Backend: Xano, Supabase, PostgreSQL, Stripe

Hardware & Native: Kotlin, Android, Bluetooth LE (BLE)

AI/LLM: Claude Code, Anthropic SDK, OpenAI API, AWS Bedrock, MCP

Professional Experience

Full-Stack Developer — amuseapp

Feb 2025 – Present · Remote

- Built and maintain the museum Console — the backoffice where curators manage audioguides, itineraries, multilingual content, and museum settings, including AI-assisted tools for translation and text generation.
- Contributed to the mobile app and led the redesign of the visitor-facing webapp.
- Integrated the Console with self-service museum kiosks (totems), covering both device-level flows and backend security.
- Connected the platform to external services — AWS (S3, Lambda), Stripe, ElevenLabs, and OpenAI — for on-demand audio generation, payments, and smart caching.

Junior Web Developer (Internship) — NeoCode Studio

Jul 2024 – Dec 2024 · Remote

- Built dynamic, database-connected websites with responsive interfaces and server-side functionality.
- Implemented interactive pages, CRUD operations, and integrations with external APIs.

Electronics Assembly Operator — ecs project

Jun 2023 – Sep 2023 · Belluno, IT

- Assembled electronic boards following technical diagrams and production specs.
- Performed quality control and component checks before and after assembly.
- Applied safety and precision practices to ensure device reliability.

Projects

Second Brain — Aira, a Personal AI Assistant

github.com/daro-hub/second-brain

Personal AI assistant on Telegram and web (text and voice). Routes each request to a RAG knowledge base or to live APIs (Calendar, Gmail, GitHub, Linear, Slack, Strava, Apple Health), runs scheduled automations, and drives a Claude Agent SDK coding agent that needs my approval before any push. Next.js, TypeScript, Supabase pgvector, OpenAI, MCP.

Longevity — AI Nutrition Assistant

github.com/daro-hub/longevity

RAG nutrition assistant that answers only from indexed scientific documents and personalises its guidance from a short intake. FastAPI backend, Next.js chat frontend, Pinecone, GPT-4.

Scolastica — AI Educational Content Generator (MVP)

github.com/daro-hub/Scolastica

MVP that turns source PDFs into template-matching PowerPoint decks with Claude. Every plan is validated against the template and text not grounded in the source is flagged; cuts about a day of manual work to roughly 30 minutes. FastAPI, Next.js, SQLite.

Education

Bachelor's Degree in Computer Science (IoT, Big Data & ML)

Università degli Studi di Udine · Udine, IT · Sep 2024 – Present

Expected graduation: 2027

High School Diploma in Computer Science

ITI Girolamo Segato · Belluno, IT · Sep 2019 – Jul 2024

Languages

Italian (Native) · English (Good working level) · French (Elementary)

Volunteer Experience

Youth Group & Summer Camp Leader — Parrocchia di Castion (Sep 2022 - Present)
